WORK EXPERIENCE

Data Analyst Consultant, HP Inc - November/2023 - March/2024 - Lima, Peru

Provided external consulting services to HP Inc. (formerly Hewlett-Packard). I was responsible for the design and implementation of new client-specific metrics and for training internal staff to manage and maintain these reporting functions.

- Faced with evolving client needs, developed customized SLA tracking reports using Power BI, SQL, and Excel, enabling precise performance monitoring and improved client satisfaction.
- Automated SLA performance monitoring, delivering detailed, actionable insights that empowered stakeholders to make informed decisions.
- Aligned reporting formats with client operational workflows, improving relevance and usability of reports.

Data Analyst, HP Inc - March/2018 - July/2023 - Lima, Peru

HP Inc. is a leading global provider of personal computing devices, printers, and related technologies. With a strong presence in both consumer and enterprise markets, HP is recognized as one of the most important companies in the IT hardware sector worldwide.

- Recognized limited real-time provider visibility and initiated automated daily reports and dashboards, contributing to a 5% SLA improvement (from 89% to 94%).
- Designed, documented, and deployed automated reports using SQL, VBA, Excel, and Power BI to streamline data analysis.
- Conducted detailed support case analysis to forecast demand and develop effective strategies.
- Supported CHATBOT implementation to handle recurrent cases, empowering end-users to self-resolve and reduce helpdesk workload.
- Analyzed ticket data to identify incident trends, leading to targeted actions that reduced service case demand by 20%.
- Supervised client-specific services including disk encryption and secure data erasure.

Help Desk Supervisor, Banco de Crédito del Perú - January/2015 - March/2018 - Lima, Peru

Banco de Crédito del Perú (BCP) is the largest financial institution in Peru and a key player in the country's banking sector. The bank has a strong focus on innovation and data-driven decision making, using advanced analytics to improve customer experience, risk management, and operational efficiency.

- Maintained SLAs through diligent oversight, process optimization, and implementation of operational standards.
- Coordinated with service providers to improve helpdesk operations.
- Trained and mentored a team of 13 service desk professionals, enhancing overall service delivery.
- Motivated team to achieve a 92% call answer SLA, surpassing the 90% monthly goal.

Help Desk Analyst, Banco de Crédito del Perú - November/2010 - January/2015 - Lima, Peru

Banco de Crédito del Perú (BCP) is the largest financial institution in Peru and a key player in the country's banking sector. The bank has a strong focus on innovation and data-driven decision making, using advanced analytics to improve customer experience, risk management, and operational efficiency.

- Provided end-user phone support, resolving technical issues via remote assistance.
- Leveraged VBA to automate SLA measurement with service providers, improving monitoring accuracy.
- Developed a .NET application to streamline printer connections, reducing related support cases by 300 monthly.
- Created automated daily operational reports, improving management's SLA visibility and response capability.
